PROFESSIONAL SUMMARY

Cybersecurity Analyst and Threat Intelligence Specialist with hands-on experience in a Security Operations Centre (SOC) environment at GTCO, one of Nigeria's leading financial institutions. Manages enterprise-grade security tooling, threat hunting, policy development, and subsidiary security deployments across a multi-entity estate. Combines network security, endpoint detection, and SIEM operations experience with automation capability, building custom Python tooling and platforms that measurably reduce analyst effort. Strong Computer Science background with a focus on proactive defence, intelligence-led security, and scalable security solutions.

PROFESSIONAL EXPERIENCE

Cybersecurity Analyst & Threat Intelligence Specialist

Guaranty Trust Holding Company (GTCO)- Lagos, Nigeria| 07/2025 - Present

- Operate within the Security Operations Centre (SOC), monitoring enterprise environments across parent and subsidiary entities for indicators of compromise, anomalous behaviour, and policy violations.
- Develop, review, and enforce security policies, access control rules, and detection logic across QRadar SIEM, Cortex XDR, and Palo Alto NGFW.
- Lead the enterprise CIMTrak File Integrity Monitoring (FIM) deployment for the parent subsidiary, scoping assets, configuring agents, defining baselines, and generating integrity reports.
- Conduct proactive threat hunting using Darktrace NDR and Cortex XDR telemetry, identifying advanced threats and lateral movement before escalation.
- Author threat intelligence advisories, vulnerability bulletins, and security alerts for technical and executive stakeholders; maintain threat actor and TTP tracking aligned to MITRE ATT&CK.
- Plan and execute security assessments across network, endpoint, and identity layers, producing findings reports with prioritised remediation guidance.
- Manage security tool deployments and integrations for subsidiaries, including Forescout NAC onboarding, Forcepoint DLP policy configuration, and CheckPoint Email Security rule management.
- Administer Active Directory environments and support network administration including VLAN segmentation, firewall rule management via Palo Alto NGFW and AlgoSec, and traffic analysis using IXIA.
- Built and maintain a Python-based SOC toolkit for log parsing, IOC extraction, alert triage, and operational reporting, reducing manual analyst effort.
- Developed a threat intelligence platform integrating advisory management, threat hunt workflows, and logging to support the full intelligence lifecycle.
- Built SyncGlide, a collaborative synchronisation dashboard, and a team task tracker used across the SOC for structured incident and task management.
- Automate workflows using Python and Cortex XSOAR scripting to orchestrate playbook actions, enrich alert context, and remove repetitive SOC tasks.

Head of Computer Department

Christ Apostles Children Academy (NYSC)- Nasarawa, Nigeria| 07/2024 - 06/2025

- Designed and implemented a structured ICT curriculum aligned with national education standards and industry best practice.
- Mentored students in programming fundamentals, web development, and digital literacy.
- Collaborated with school leadership and external partners to integrate emerging technologies into classroom learning.

Software Development Intern

BrandOne Technologies Limited- Abuja, Nigeria| 02/2022 - 10/2022

- Assisted senior developers in the design and development of software applications across the full development lifecycle.

- Applied version control best practice using Git and GitHub for collaborative project management.
- Contributed to graphic design and multimedia editing initiatives, broadening cross-functional skills.

TECHNICAL SKILLS

Security Platforms:QRadar SIEM, Cortex XDR, Palo Alto NGFW, Darktrace NDR, Forescout NAC, CIMTrak FIM, AlgoSec, Forcepoint DLP, CheckPoint Email Security, IXIA

Security Disciplines:SOC Operations, Threat Intelligence, Threat Hunting, File Integrity Monitoring, Vulnerability Assessment, Policy Development, Incident Response, Security Advisory Writing

Networking & Infrastructure:TCP/IP, Firewall Rule Management, VLAN Segmentation, Active Directory, Systems Administration, Network Access Control, Network Traffic Analysis

Scripting & Automation: Python, Cortex XSOAR, Bash, REST APIs, Log Parsing, SOAR Playbooks

Frameworks & Standards:MITRE ATT&CK, ISO 27001 (awareness), NIST CSF (awareness)

Development:HTML5, CSS3, JavaScript, PHP, C#, ASP.NET, Git, GitHub, SQL

PROJECTS

SOC Toolkit| 2025 - Present
Python-based internal utility covering log ingestion, IOC parsing, alert triage automation, and daily SOC reporting. Adopted as a core operational tool by the SOC team.

TealHunt| 2025 - Present
Threat intelligence platform supporting advisory creation, hunt hypothesis tracking, intelligence logging, and analyst knowledge-base management.

SyncGlide| 2025 - Present
Collaborative team dashboard enabling synchronised task visibility, status tracking, and cross-analyst coordination within a SOC environment.

Information Management System| 08/2023 - 01/2024
Final-year thesis project: PHP and SQL information management system with a normalised database architecture and advanced search, improving retrieval accuracy.

AgentIde| 2026 - Present
EDR/XDR assessment framework: a Go agent runs EICAR, LOLBin, anti-tamper and boot-gap modules and streams MITRE ATT&CK-scored results to a central dashboard.

ExtSafe| 2026 - Present
Browser extension safety auditor that scrapes extension metadata and risk signals, supports review workflows, and exports findings to Excel.

MITM Proxy Shield| 2026 - Present
Network-level ad blocking and content filtering platform built on Squid and SquidGuard, with a Flask management API and Chrome MV3 telemetry extensions.

Daily BRIEF| 2026 - Present
Daily operations logger with AI-assisted handover generation, multi-user access control, and PDF/CSV/XLSX export.

PACMAN| 2026 - Present
A safe control plane for proxy auto-config (PAC) delivery.

LinkPass| 2026 - Present
Team-based enterprise password manager with end-to-end encryption, RBAC and mandatory MFA.

AssetPulse| 2026 - Present
Endpoint compliance platform reconciling hardware inventory against Cortex XDR, Qualys and CrowdStrike telemetry to surface shadow IT and compliance drift.

EDUCATION

Bachelor of Science - Computer Science| 2018 - 2024
Nasarawa State University, Keffi- Nasarawa, Nigeria| Grade: Second Class Upper (2:1)

CERTIFICATIONS

- **Certified in Cybersecurity (CC)**- ISC2 | 2026
- **Fortinet NSE 1 - Network Security Associate**- Fortinet | 2025
- **Fortinet NSE 2 - Network Security Associate**- Fortinet | 2026
- **Fortinet NSE 3 - Network Security Associate**- Fortinet | 2026

PROFESSIONAL DEVELOPMENT

- Ethical Hacking & Vulnerability Assessment
- Artificial Intelligence Principles & Techniques
- Business Administration and Management (MBA)
