

David Idemudia Odigie

Cybersecurity Analyst | SOC & Threat Intelligence Specialist

david.odigie.ide@gmail.com | +234 901 327 4980 / +234 703 723 7759 | Abuja, Nigeria

PROFESSIONAL SUMMARY

Results-driven Cybersecurity Analyst and Threat Intelligence Specialist with 1+ year of hands-on experience in a Security Operations Centre (SOC) environment at GTCO, one of Nigeria's leading financial institutions. Proficient in managing enterprise-grade security tooling, threat hunting, policy development, and subsidiary security deployments. Combines deep technical expertise in network security, endpoint detection, and SIEM operations with automation capabilities, delivering custom Python-based tooling and platforms that enhance operational efficiency. Strong background in Computer Science with a passion for proactive defence, intelligence-led security, and building scalable security solutions.

PROFESSIONAL EXPERIENCE

Cybersecurity Analyst & Threat Intelligence Specialist Guaranty Trust Holding Company (GTCO)

Jul 2025 – Present
Lagos, Nigeria

- Operate within the Security Operations Centre (SOC), monitoring enterprise environments across parent and subsidiary entities for indicators of compromise, anomalous behaviour, and policy violations.
- Develop, review, and enforce security policies, access control rules, and detection logic across multiple security platforms including QRadar SIEM, Cortex XDR, and Palo Alto NGFW.
- Lead the enterprise CIMTrak FIM (File Integrity Monitoring) deployment for the parent subsidiary — scoping assets, configuring agents, defining baselines, and generating integrity reports.
- Conduct proactive threat hunting sessions leveraging Darktrace NDR and Cortex XDR telemetry, identifying advanced threats and lateral movement patterns before escalation.
- Author threat intelligence advisories, vulnerability bulletins, and security alerts distributed to technical and executive stakeholders; maintain threat actor and TTPs tracking aligned to MITRE ATT&CK.
- Plan and execute security assessments across network, endpoint, and identity layers; produce findings reports with prioritised remediation guidance.
- Manage security tool deployments and integrations for subsidiaries, including Forescout NAC onboarding, Forcepoint DLP policy configuration, and CheckPoint Email Security rule management.
- Administer Active Directory environments and support network administration tasks including VLAN segmentation, firewall rule management via Palo Alto NGFW and AlgoSec, and traffic analysis using IXIA.
- Built and maintain the team's SOC Toolkit — a Python-based utility for log parsing, IOC extraction, alert triage, and operational reporting — significantly reducing manual analyst effort.
- Developed a Threat Intelligence Platform integrating advisory management, threat hunt workflows, and logging capabilities to support the full intelligence lifecycle.
- Created SyncDeck, a collaborative synchronisation dashboard, and a Team Task Tracker used across the SOC team for structured incident and task management.
- Scripted automation workflows using Python and Cortex XSOAR scripting to orchestrate playbook actions, enrich alert context, and automate repetitive SOC tasks.

Head of Computer Department Christ Apostles Children Academy (NYSC)

Jul 2024 – June 2025
Nasarawa, Nigeria

- Designed and implemented a structured ICT curriculum aligned with national education standards and industry best practices.
- Mentored students in programming fundamentals, web development, and digital literacy, fostering problem-solving skills and technical confidence.
- Collaborated with school leadership and external partners to integrate emerging technologies into classroom learning.

Software Development Intern
BrandOne Technologies Limited

Feb 2022 – Oct 2022
Abuja, Nigeria

- Assisted senior developers in the design and development of software applications across the full development lifecycle.
- Applied version control best practices using Git and GitHub for collaborative project management.
- Contributed to graphic design and multimedia project editing initiatives, broadening cross-functional skill sets.

CERTIFICATIONS

Certified in Cybersecurity (CC) ISC2 Credential verified via ISC2 Member Portal	2026
Fortinet NSE 1 — Network Security Associate Fortinet Network Security Expert Program Information Security Awareness	2025
Fortinet NSE 2 — Network Security Associate Fortinet Network Security Expert Program The Evolution of Cybersecurity	2026
Fortinet NSE 3 — Network Security Associate Fortinet Network Security Expert Program Fortinet Security Solutions	2026

KEY PROJECTS & AUTOMATION

SOC Toolkit ▪ Python-based internal utility covering log ingestion, IOC parsing, alert triage automation, and daily SOC reporting; adopted as a core operational tool by the team.	2025 – Present
Threat Intelligence Platform ▪ Custom-built platform supporting threat advisory creation, hunt hypothesis tracking, intelligence logging, and analyst knowledge-base management.	2025 – Present
SyncDeck ▪ Collaborative team dashboard enabling synchronised task visibility, status tracking, and cross-analyst coordination within the SOC environment.	2025 – Present
Information Management System ▪ Final-year thesis project: designed and developed a PHP/SQL-based IMS with robust database architecture and advanced search functionality, reducing data processing time and improving retrieval accuracy.	Aug 2023 – Jan 2024

TECHNICAL SKILLS

Security Platforms: QRadar SIEM · Cortex XDR · Palo Alto NGFW · Darktrace NDR · Forescout NAC · CIMTrak FIM · AlgoSec · Forcepoint DLP · CheckPoint Email Security · IXIA

Security Disciplines: SOC Operations · Threat Intelligence · Threat Hunting · FIM Deployment · Vulnerability Assessment · Policy Development · Incident Response · Security Advisory

Networking & Infrastructure: TCP/IP Networking · Firewall Rule Management · VLAN Segmentation · Active Directory · Systems Administration · NAC · Network Traffic Analysis

Scripting & Automation: Python · Cortex XSOAR Scripting · Bash · REST APIs · Log Parsing · SOAR Playbooks

Frameworks & Standards: MITRE ATT&CK · ISO 27001 (awareness) · NIST CSF (awareness)

Development: HTML5 · CSS3 · JavaScript · PHP · C# · ASP.NET · Git / GitHub · SQL

Productivity: Microsoft Office Suite · Google Workspace · Technical Report Writing · Security Advisory Writing

EDUCATION

Bachelor of Science — Computer Science Nasarawa State University, Keffi Grade: Second Class Upper (2:1)	2018 – 2024 Nasarawa, Nigeria
---	----------------------------------

CONTINUING EDUCATION & PROFESSIONAL DEVELOPMENT

- Ethical Hacking & VAPT
- Artificial Intelligence Principles & Techniques
- Business Administration and Management (MBA)
